Shoe Shopping Website

Rajendra Prasad Peteti

Date: 03-12-22

Course title: CSE-326

Teacher's name: Radhika Nambiar

About the Website:

This following project is the front end of a shoe shopping website. Using Html and CSS we have created the shoe shopping website which gives insight about the shoes and its design. By this website we can directly delivery shoes from the seller to the customer's hand safely. The following pages will contain the tags that have been used

and some screen shots of the webpages created.
